```

. How would you use the docker run command with -it, -e, -v, and --name to:

- Set an environment variable APP_ENV=production.
- Name the container my_app.
- Start an interactive terminal in an image called my_image?

- Write the full command for the scenario above.

ANSWER

Docker run -it -e APP_ENV=production –name my_app -v host_folder:continer_folder my_image
